

A cross-sectional view of a multi-layered structure 10. The structure consists of several layers: a top layer 22 with diagonal hatching, a layer 20, a layer 18 with diagonal hatching, a layer 14, and a bottom layer 12. A vertical layer 16 is positioned in the center, extending from the layer 14 down to the layer 12. A dimension line labeled H indicates the height of the top section of the structure.

This diagram shows a cross-sectional view of a multi-layered structure. A central vertical feature, labeled 24, is positioned on top of a layer labeled 18. The layer 18 is part of a larger assembly that includes layers 12 and 16. The height of the central feature 24 is indicated by a dimension line labeled H . The layers are labeled 10, 12, 16, 18, 20, 22, and 24.
